

Community Beautification

MGP actively participates in community-wide beautification efforts organized by such organizations on the Chamber of Commerce in cooperation with municipal agencies. Company employees volunteer their time to assist in regularly scheduled clean-up projects to enhance the visual community appeal. These include large-scale initiatives held each spring and fall, and which draw participation from numerous individuals, service organizations, municipal employees and many other local and area businesses.

Additionally, MGP employees take time each month to help beautify the Company's premises under a formalized program called "Project Pride." The formation of MGP "Bucket Brigades" originated from this program. Brigade members are grouped into multiple teams and given designated areas around plant and office facilities to keep litter-free. This not only helps improve the appearance of Company facilities, but also is another way in which MGP is able to consistently contribute to the community's overall beautification efforts.
