Environmental and Sustainability Policy Statement

MGP Ingredients, Inc. (MGP) is committed to continued growth in a responsible manner and operates with a genuine respect for people and nature. We are committed to sustainable development for the prosperity of the company and its stakeholders and for the well-being of our community neighbors. In today's resource-constrained world, business is connected to people, environment, community, and stakeholders more than ever before. MGP recognizes the impact climate change may have on our business operations and productivity, and we are committed to minimizing the impact we have on the environment through reductions in greenhouse gas emissions. In order to secure a sustainable future for our business and stakeholders, MGP is dedicated to achieving environmental sustainability excellence in its operations and supply chain. All of our environmental and sustainability focus areas are aligned with the United Nations Sustainable Development Goals (UN SDGs).

MGP is committed to:

- Complying with all applicable federal, state, and local environmental laws and regulations
- Reducing greenhouse gas emissions and other air emissions through careful planning
- Conserving natural resources through efficient use of raw materials, water, and energy
- Minimizing waste through a 'reduce, reuse and recycle' approach
- Reviewing our environmental management system on an annual basis
- Providing periodic training to employees on how to conduct their activities in an environmentally responsible manner
- Reviewing the environmental and sustainability objectives through a system of continuous monitoring and periodic reporting out to company executives and the board of directors
- Making this policy publicly available to all employees and interested parties
- MGP expects its suppliers and business partners to comply with applicable environmental laws and regulations, and promote conservation of natural resources
